

OFF THE CANVAS: A DEMONSTRATION OF WHAT DIGITAL ART HAS TO OFFER

PRESENTED BY JORDAN PIETZ, MA, CMI

June 26, 2023 - Following General Meeting

This demonstration is designed to give a brief introduction to those who are interested in learning more about digital art. Some of the topics the demo will cover include exploring what digital art is and what advantages it has to offer to the artist, as well as briefly introducing some of the industry standard software packages and the capabilities they offer. This course is perfect for the traditional artist who is interested in learning if digital art is right for them and is intended to be a steppingstone towards specific digital software and workflow instruction.

Jordan Pietz, MA, CMI, is a Senior Medical Illustrator at MD Anderson Cancer Center with 15 years of experience illustrating complex scientific concepts in the digital space. Jordan loves digital painting and digital sculpting and in his spare time loves to draw the human figure in pencil and play with watercolor.
